

**Myopia Control for Opticians and Technicians:**

**Thursday, September 19<sup>th</sup>**

**8:30am – 9:30**

This document is a link to a folder with the presentation as well as other resources. Feel free to use the Link or the QR code to access the presentation for review.

The upload for handouts only allows for one document, and I would like to have attendees have access to the latest version of the presentation (myopia control advances and changes by the month).

Also in this folder is a list of resources that I find useful for both professional education and patient education, including a link to the Brien Holden Vision Institute and a few good (and recent) journal articles from Contact Lens Spectrum and Review of Optometry related to Myopia control.
