3

Powerboost

An energy drink can give you a quick pick me up.
What can we do to help with eye fatigue?

4

What is a Powerboost Lens?

Type of Near Task Specific Lens

5

Our Learning Journey:

- Brief Historical Background
- Marketing Message/Fitting Recommendations
- A Shallow Dive into the Characteristics and Performance
- Overview of Several Product Portfolios
- Case Presentations to Illustrate benefits and contraindications

Please use this presentation for staff training and review

6

Technology Timeline: Over a century ago

1920's - 1930's - Radio
 1940's - 1950's - B&W TV
 1950's - 1990's - Color TV
 1990 - present- HD TV

7

The Digital Revolution: Shift from Mechanical to Electronic

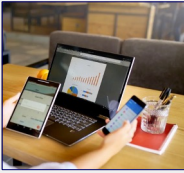

One small, handheld device Lots of large individual things

50 years: Radio to Computer
 20 years: digital devices major part of life

8

The Physical and Visual Response

1990's: Computers are the major source of information

Breakdown of DES* Symptoms
(6 out of 10 adults report)

- 35% Neck/shoulder pain
- 27% Dry eyes
- 28% Headaches
- 32% Eye strain
- 28% Blurred vision

* DES = Digital Eye Strain, formerly Computer Vision Syndrome (CVS)

9

Some Perspective on DES

The Vision Council Digital Eye Strain Report

90% of patients do not talk with their eye care provider about digital device usage.

73% of Americans said they did not know about the benefits of computer eyewear.

#1 reason for not wearing computer eyewear:
"My eye care provider never recommended them"

10

Lens Manufacturers Respond to DES

2009: Essilor launches Anti-Fatigue Lens

"... Essilor Anti-Fatigue lenses feature a special "Power Boost" area in the lower portion of the lens, to give the wearer's eyes greater clarity and comfort when focusing up-close for extended periods..."

Compensate for:

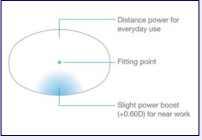

- DES
- Closer working distance

POWERBOOST term created by Dr. Dennis Fong

11

Design Idea

Design:

- 0.60D "power boost" in the lower lens
- Performs like a Single Vision lens; minimal swim and magnification
- Reduces Digital Eye Strain symptoms

12

Marketing Messages

Marketing Messages	Alternate Names
<ul style="list-style-type: none"> ● Target Pt: Pre & emerging presbyopes ● Treat DES ● Excessive Digital Device Usage ● Compensate closer WD (33 cm) ● Boost ≠ ADD 	<ul style="list-style-type: none"> ● Anti-Fatigue Lens ● Single Vision with a power boost ● Starter Progressive

13

Powerboost Lenses – Fitting Guides

Hoya Sync III

ORDERING

When ordering, please provide the following information and the chosen lens design for customer support.

MINIMAL OR NO SYMPTOMS
SYNC 3 (H0302)

MILD TO MODERATE SYMPTOMS
SYNC 3 (H0303)

MODERATE TO SEVERE SYMPTOMS
SYNC 3 (H0305)

Fitting Zetta Digital Lens

SELECT LENS

200 Digital Lens is best for a progressive lens. 200 Digital Lens is available in 4 add powers, ranging from +0.50D to +1.25D. The appropriate add power should be determined by a new refraction.

Esclor Eyezen

Problem	Problem	Problem	Problem
Problem 1: Accommodate 10-18	Problem 2: Accommodate 18-24	Problem 3: Accommodate 24-30	Problem 4: Accommodate 30-36
Problem 1: Accommodate 10-18	Problem 2: Accommodate 18-24	Problem 3: Accommodate 24-30	Problem 4: Accommodate 30-36

ADD

Designed for:

- Light to moderate digital eye strain symptoms
- Default for patients 34 years or younger

Designed for:

- Moderate digital eye strain symptoms
- Default for patients 35 years or older

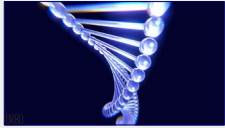

Fitting Guides

- By Symptoms?
- By Age?
- By Add Power? (Boost Power?)

14

Deconstructing a Powerboost Lens

- Optical Properties
- Performance Comparison
 - Single Vision
 - Bifocal
 - Computer Lens
 - PAL
- Boost = ADD?

15

How can we better understand variable power lens designs?

16

What Can We Measure?

Area of perceived clear vision

- Cylinder Aberration Contour Plot
- Perceived clear vision
 - Isometric contour lines (unwanted cylinder)

17

Is a Powerboost = Single Vision?

18

Is a Powerboost = Bifocal?

19

Is a Powerboost Lens = Computer Lens?

20

Is a Powerboost = Progressive lens?

	Relax 65 +0.65
	Relax 80 +0.80

Evan: 56 YO retired Silicon Valley tech, traveling the world
CC: PAL not ideal for viewing seat-back screens in flight
Rx: -5.00 DS OU Add +2.00
Seatback screen EA +1.25
BV, OH, GH = WNL, unremarkable

43

Clinical Pearls

- Developed to relieve DES, closer WD
- Cat = SV, but more like hybrid variable power lens
- Prescribe using visual assessment data
- Not just for Pre-presbyopes/Digital Eye Strain
 - Accommodative Disorders
 - Binocular Dysfunction
 - 1st time PAL
 - Task Specific/Advanced Presbyope

44

Contraindications

- Convergence insufficiency
- Moderate exophoria at near
- Pseudo Non-adapts

45

At the End of the Day

- Did I address the chief concern with the appropriate recommendations?
- Is it an improvement over what they are used to?
- Continue to develop your skills in the art and science of vision care

46

On behalf of Vision Expo, I sincerely thank you for being here this year.

Vision Expo Has Gone Green!

We have eliminated all paper session evaluation forms. **Please be sure to complete your electronic session evaluations online** when you login to request your CE Letter for each course you attended! Your feedback is important to us as our Education Planning Committee considers content and speakers for future meetings to provide you with the best education possible.
